

Wouldn't it be great to finally have a US-built acoustic/electric bass guitar that...

- is unaffected by travel changes in temperature & humidity?
- delivers all string vibration downward onto bridge saddle?
- ensures no more lost bridge pins backstage?
- sports top-grade Englemann spruce or flame maple tops?
- is available fretted or fretless, in 4- or 5-string models?
- has the most distinctive look of any bass since _____?
- makes you think about leaving your "doghouse" home?
- AND produces an incredibly rich and deep acoustic bass tone?

(Yes, it would.)

THE LONG TRAIL BASS GUITAR, 4- OR 5-STRING

"...designed for live performance"

MSRP \$3300 (4-), \$3600 (5-)
